

## THOUSAND ISLANDS COLLECTION

MSS. COLL. #109

1.2 linear feet

1875-2005

### History

The Thousand Islands are located on the St. Lawrence River between the United States and Canada, just east of Lake Ontario. There are actually over 1,800 islands in the 1000 Islands region (1,864 according to the 1000 Islands International Tourism Council), but many are too small to be inhabited. The larger islands, however, feature summer homes ranging from rustic cottages to mansions, and a couple of castles (Boldt and Jorstadt, now known as Singer Castle). This region has the longest undefended international boundary on earth.

Regional organizations such as **Save the River** and the **Thousand Islands Association** were established to promote environmental, educational, and quality of life issues, in and along the shores of the St. Lawrence River, to insure the area's ecological well being.

### Scope & Content

This collection contains photo booklets of the Islands and the St. Lawrence River, newspapers, index to summer cottages in the late 18th century, and an engraved plate for making money from the Sackets Harbor Bank. Also included are photographs of a couple of hotels in the area and various booklets on the history of the islands, towns, and villages along the U.S. and Canadian borders.
